25 per case 130V

QUARTZ LAMP

500T3Q/CL
12 per case
130V
\$4.00 EA.

WHY USE 130 VOLT LAMPS?

Sure they cost more. Here's why. 130V lamps are manufactured with a heavier filament. They burn slightly less bright than 120V lamps, but last up to 2-1/2 times longer. This saves on costly replacement labor.

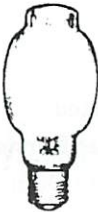

HIGH PRESSURE SODIUM

ATLAS LIGHTING
1-800-272-BULB

Q-LUX COMPACT FLUORESCENTS

Perfect for a hanging ceiling fixture. Three diffusers to choose from, white and clear tubulars and a white globe. Available in a 13 watt quad.

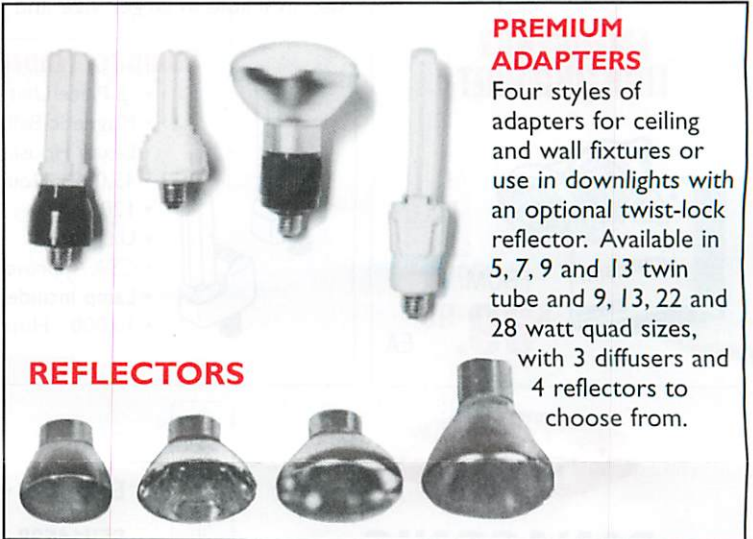

EXIT RETROFIT KITS

Six ways to get compact fluorescent life and energy savings out of your existing incandescent exit signs.

ECONOMY ADAPTERS

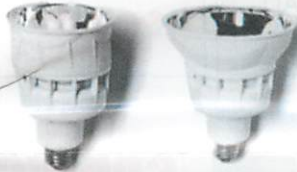

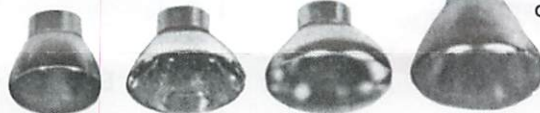

The best way to convert ceiling and wall fixtures into compact fluorescents for the least amount of money. Available in 5, 7, 9 and 13 twin tube and 9, 13 and 22 watt quad sizes.

PREMIUM ADAPTERS

Four styles of adapters for ceiling and wall fixtures or use in downlights with an optional twist-lock reflector. Available in 5, 7, 9 and 13 twin tube and 9, 13, 22 and 28 watt quad sizes, with 3 diffusers and 4 reflectors to choose from.

REFLECTORS

OMNI/FLOOD

Perfect for ceiling downlights. Available with 2 reflectors and 3 optional lenses.

OMNI/FLOOD WET LOCATION

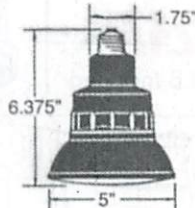

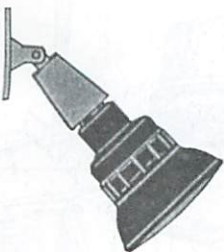

All the special features and benefits of our Omni/Flood plus the advantage of being U.L. listed for wet locations.

ProLight now offers the powerful OmniFlood QCR38 series U.L. listed for wet locations. It has all the benefits of the new generation Omni/Flood with its **50% increase** in light output from a specially designed reflector. And, the long life ballast will last through 10 replaceable 13 watt quad compact fluorescent bulbs, giving a total life of up to **100,000 hours**. **The Omni/Flood Wet Location is U.L. approved for outside applications where moisture or damp conditions are a concern.**

The appearance of the Wet Location series is different in that it comes in black rather than the traditional white. The real difference, however, comes from the rubber seal between the ballast and the reflector, the sealing plastic around the screw shell, and a specially designed snap on ring to seal the lens.

The Wet Location Omni/Flood is available with a spot or flood lens, in regular or high power factor. It carries a **ten year limited warranty**.

Lighting Problems? L.E.D. Solutions.

A retail chain has hundreds of stores nationwide with incandescent exit signs that have created numerous fire safety citations due to burned out bulbs. The company supplies each location with the Ultra-Bright WATT-MAN™ Plus L.E.D. Retrofit Kit that provides everything needed to convert the signs to L.E.D. technology, eliminating the citation issue while reducing energy consumption by 90%.
Model UBW120KTL

A commercial bank with hundreds of branches incurs frequent and expensive lighting service contractor maintenance bills for the replacement of the burned out incandescent bulbs in their drive-through teller lane signal fixtures. The bank replaces the incandescent bulbs with the WATT-MAN™ L.E.D. signal fixture retrofit lamps, eliminating the maintenance expense.

Models P25C16R120M & P25C16G120M

A manufacturer of lighting fixtures wants to incorporate an L.E.D. night light lamp in a security detention light fixture that will stand up to the rigors of abuse and require no maintenance. A custom designed WATT-MAN™ L.E.D. lamp provides the maintenance-free and vibration resistant solution.

Model WFWHT277P

An industrial facility experiences frequent incandescent signal lamp failures as a result of vibration generated by their machinery, causing costly disruptions in the production process. The manufacturer replaces the fixtures with the WATT-MAN™ L.E.D. signal fixture, eliminating the problem.

Model SFR120DF

A warehouse facility has outdated traffic control fixtures for their loading docks that have become a maintenance headache due to frequent lamp replacement. The fixtures are replaced with the WATT-MAN™ L.E.D. traffic control signal fixture eliminating maintenance costs and improving safety.

Model SFR/G120RV

A medical center seeks an energy efficient, maintenance-free lighting solution for their blue signal fixtures located above recessed fire extinguishers and fire hose cabinets. The fixtures are retrofitted with the WATT-MAN™ L.E.D. Domelamp, which included the lens and L.E.D. light source in a single package.

Model LDBL120M
